

Intern – Linux Systems Engineer (Summer 2025)

Location: Prague, Czech Republic

Work Model: On-site

Schedule: Full-time, 12-week fixed-term contract

Internship Dates: 1 July – 30 September 2025

Compensation: 250 CZK/hour

Eligibility: Must be an active full-time student during the internship

Cover Letter: Encouraged – yes, we actually read them!

Who We Are

We're more than just a company—we're a global leader in digital safety. Through our family of trusted brands—**Norton, Avast, LifeLock, Avira, AVG, ReputationDefender, and CCleaner**—we protect over **500 million people** worldwide. Bring your bold ideas and unstoppable drive—**join #TeamGen** and shape the digital world with us.

What You'll Do

- Learn to operate and manage Linux-based systems at scale
- Support engineering teams in deploying and operating services reliably
- Automate infrastructure wherever possible
- Write/update scripts and configuration (Bash, Python, Puppet, Terraform)
- Troubleshoot basic system issues and perform monitoring

What You Bring

Required Competencies

- Solid hands-on experience with Linux OS (RHEL-based distributions preferred)

- Familiarity with TCP/IP protocols
- Shell scripting experience
- Desire to learn and solve technical challenges
- Collaborative mindset, good communication, and positive attitude
- English proficiency (written and spoken)

Preferred Qualifications

- Familiarity with scripting languages (Bash, Python)
- Exposure to config management tools (Puppet, Terraform)
- Experience with public cloud (GCP, Azure, AWS)
- Knowledge of containerization (Docker, Kubernetes)

Why Join Us

- Paid internship with a global digital safety leader
- Work in a truly international company and supportive team
- Hands-on mentorship from experienced infrastructure engineers
- Benefit Plus Point Program (Cafeteria plan)
- Real infrastructure challenges at scale—no simulated exercises
